

November 20, 2020

To the Brescia community,

I am writing today to update you on behalf of Brescia's Pandemic Planning Committee about a self-reported positive case of COVID-19 that visited Brescia's campus.

The individual who self-reported has been in contact with the Middlesex-London Health Unit (MLHU). MLHU staff leads all COVID-19 contact tracing, and at this time, no additional steps need to be taken by members of the Brescia community as the level of risk/exposure has been determined as low.

The Middlesex-London Health Unit is responsible for disclosing all positive COVID-19 cases to the public and determines the level of detail provided, based on the level of risk to the community.

To respect patient confidentiality regulations, Brescia is only informed of positive cases if MLHU has determined there is a high risk to the campus community or broader London community. MLHU has not contacted us at this time.

In my email message last week, I shared that our goal is to keep our community informed to ensure all students, staff and faculty remain safe and healthy.

I will continue to update our community as necessary so we are able to work together and maintain the health, safety and well-being of everyone at Brescia.

Sincerely,

Cheryl

Cheryl Jensen, BSc, M.Ed.

Interim Principal
